

# VACANCY BULLETIN

**"We've got your technological aspirations covered. End-to-end."** Sanmina-SCI is a leading electronics contract manufacturer serving the fastest-growing segments of the global EMS market. Recognised as a technology leader, we provide end-to-end manufacturing solutions, delivering unsurpassed quality and support to large OEMs. And we are present in over 21 countries, spanning 5 continents; including a state-of-the-art plant in Penang. To meet rising global demand, we are looking for :

## Test Engineer

- Manage and interface with customer on test product support.
- Support line on test development activities and test continuous improvement.
- Lead a team of test technicians on tester support and debug activities. Manage debug WIP to meet target set.
- Support production line to fulfill shipment plan.
- Working experience as test engineer.
- Knowledge in Agilent and GenRad ICT tester is an advantage

## Test Technician

- Support and improve ICT and Functional yield.
- Clear debug WIP and RMA per target plan.
- Support and maintain the test equipment including PM activities.
- Work with production to fulfill shipment plan.
- Possess test working experience in PCBA industries.
- Knowledge Agilent and GenRad ICT tester is an advantage.

## **Process Engineer**

- To deliver and prepare all product transferred and provide quality improvement support.
- To liaise with program team, lead all NPI and mass production build.
- Able to define and implement processes and parameters for PCB and Box-Build Assembly.
- Familiar with problem-solving techniques and have considerable knowledge in the design of experiments.
- Able to lead a team for projects start-up and improvement activities.
- Responsible for quality, yield and cost in process engineering.
- Responsible for qualification and buy-off of equipment and processes.
- Define acceptable process yields for critical processes as well as troubleshoot line and process-related issues on production lines.
- Drive production towards zero defect.

## **Process Technician**

- Assist process engineering team to plot temperature profile.
- Performed PM for jig fixtures.
- To do programming and optimized conformal coating and potting.

## **Equipment Technician**

- Responsible on machine downtime, ppm tracking, product yield improvement.
- Equipment 5S and Preventive maintenance.
- Assist in machine relocation activity.
- Documentation preparation.
- Candidate must possess at least a Certificate/Diploma,
