

VACANCY BULLETIN

REHON INDUSTRIES SDN BHD was incorporated in 1982 to service the semiconductor and electronics industries in the northern region of Malaysia. Its primary business activities include the fabrication of high precision tools and dies, precision metal stamping and high precision stamping parts as well as automation machine catering to the expectations of the semiconductor and electronics related industries.

Today **RHN** is a group of companies that design, fabricate and test the semiconductor lead-frame stamping tool. Many of our design and engineering staff are trained for several years in Japan. Today we are still working closely with our Japanese counterparts. We invite suitable candidates to apply for the following positions:

Tooling Designer (Stamping)

Responsibilities:

- Responsible for new customized drawing
- Communicate with customers for customize drawing (if necessary), for design purpose
- Investigate, recommend, and take corrective action to overcome technical problems
- Assemble die set after completion of part fabricating
- Ensure all parts/die set according to Quality Objective before deliver to customers
- Maintain a high standard of housekeeping
- Any other tasks assigned by superior from time-to-time

Requirements:

- At least 1 year experience in the related field/fresh graduates are welcome to apply
- Diploma in Mechanical or its equivalent
- Must possess a good knowledge in maintenance and workshop
- Good analytical skill and able to decipher engineering and tool drawings
- Possess a good interpersonal and communication skills
- Well verse in AutoCAD, Windows operating system and Microsoft Office
- Highly motivated, results orientated and a team player
- Experience in stamping industry
- 2 full-time positions available

VACANCY BULLETIN

Tool & Die Maker

Responsibilities:

- Repair, modify, and adjust new tooling
- Transport tooling to work area
- Examine tooling to determine feasibility of in-house repairs or modifications
- Diagnosing problems and determine corrective actions
- Polishing, grinding, drilling, machining and fitting of new parts and tooling
- Ensure tooling are in good and proper mechanical working order
- Perform quality work
- Ensure continuity of production and safety of all personnel
- Maintain a high standard of housekeeping
- Any task assigned by superior from time to time

Requirements:

- Basic mechanical tooling concepts
- Trim tool knowledge
- Basic CAD concepts
- Hard working grain repair
- Grind cutting tools
- 3 years prior Tool and Die Repair experience
- Experience in repairing metal stamping tooling
- Accountability
- Must be able to communicate in English - written and verbal
- Ability to work well with others, team oriented, and ability to work independently without close supervision

VACANCY BULLETIN

Project Engineer (Mechanical Engineer)

Responsibilities:

- Develop project objectives by reviewing project proposals and plans and conferring with management
- Determines project responsibilities by identifying project phases and elements, assigning personnel to phases and elements and reviewing quotations from vendors
- Confirm product performance by designing and conducting test
- Determine project schedule by studying project plan and specifications, calculating time requirements and sequencing project elements
- Maintains project schedule by monitoring project progress, coordinating activities, resolving problems
- Controls project plan by reviewing design, specifications, recommended actions
- Prepare project status reports by collecting, analyzing, and summarizing information and trends
- Maintain project data base by writing computer programs, entering and backing up data
- Contributing to team effort by accomplishing related results as needed
- Responsible on completeness of PPAP, DFMA, CPK, FMEA and product FFF collaboration
- Responsible on Project Master Schedule and resources deployment
- Any other tasks assigned by superior from time to time

Requirements:

- At least 1 year experience in the related field/fresh graduates are welcome to apply (training will be provided)
- Diploma in Mechanical or its equivalent
- Must possess a good knowledge in maintenance and workshop
- Good analytical skill and able to decipher engineering and tool drawing
- Possess a good interpersonal and communication skills
- Well verse in AutoCAD, Windows operating system and Microsoft Office
- Highly motivated, results orientated and a team player
- Experience in stamping industry
- 2 full-time positions available

VACANCY BULLETIN

Draftsman (Engineering Team)

Responsibilities:

- Drafting and modification of part and tool drawing
- Assist the Maintenance Supervisor to carry out repair and involve in Milling and Grinding
- Assist the Maintenance Supervisor in tool and/or die testing and setup.
- Plan and design new tools and jigs meant for part confirmation
- Make purchases and follow up for part, component and material for new tool fabrication
- Design and assembly of jigs and fixture
- Setup and implement a control system for filing all customers' part and tool drawing
- Assist the Maintenance Supervisor in all his responsibilities as specified in the JD
- Other related functions assigned by the Maintenance Manager and Supervisor from time-to-time

Requirements:

- At least 1 year experience in the related field/fresh graduates are welcome to apply
- Diploma in Mechanical engineering or any other equivalent field
- Must possess a good knowledge in maintenance and workshop
- Good analytical skill and able to decipher engineering and tool drawings
- Well verse in AutoCAD, Windows operating system and Microsoft Office
- Highly motivated, results orientated, and a team player
- Possess a good interpersonal and communication skills

Interested candidates are invited to apply online or write-in with a full resume stating qualifications, contact number, working experience, and expected salary together with a recent passport-sized photograph to pl.cheong@rhn-group.com / sy.tan@rhn-group.com or to the following address:
