

VACANCY BULLETIN

DY DMG was incorporated in 2017 as a conglomerate that is made up of DY MNG Sdn Bhd and DY MNG Engineering Sdn Bhd. Both companies are reputable business entities that rebranded to consolidate the business convergence. DY MNG Sdn Bhd is formerly known as MNG Technology Sdn Bhd while DY MNG Engineering Sdn Bhd used to be known as D & Y Engineering (M) Sdn Bhd. The companies were incorporated in 2006 and 2007 respectively.

DY MNG leverages on the vast experience of the sister companies to offer professional services in the areas of mechanical and electrical systems. We have the expertise to carry out design, installations, repairs, and maintenance of HVAC, building automation system, clean room construction, smoke spill system, process cooling water system, compressed dry air system, ducting work, piping work, electrical work, and many more.

With our advanced project design and management capabilities that make use of cutting-edge modeling technologies, we can handle complex projects that place a massive demand on in-depth knowledge of electromechanical systems. Our team of engineers has the competence to use the latest applications to perform advanced tasks such as tendering, designing, engineering calculation, heat load calculation with high precision.

Our prowess in the industry is apparent in the various world-class projects we have executed successfully. We have also received the prestigious ISO 9001:2015 certification which attests to our uncompromising stand for quality in all our project engagements. We shall continue to upscale and reinvent our services to deliver more value to our customers. Power and Industrial Company Limited's services are all in-house, covering a broad spectrum from engineering to logistics. As a result, we can enhance infrastructure, create new Plants and machinery, handle complete logistics, maintain plants, metal works, and, and reshape entire operations processes.
